THE CHILD AND FAMILY INSTITUTE ST. LUKE'S AND ROOSEVELT HOSPITAL CENTERS

Speak in Spanish NYC' Spanish language classes have been instrumental to helping our staff at the Child and Family Institute converse with patients who are native Spanish speakers and have difficulty with the English language. Our tutor worked effortlessly with our employees to customize the Spanish classes to our hospital staff needs. Her approach to teaching uses both, a professional and personal touch, which makes her classes a more interesting and rich experience. She has been working with us for four years and we couldn't have found an exceptional resource. Due to her popularity and success we have added an additional advanced class and have graduates of her program working fluently in Spanish with our patients. This has both enriched our program and made the experience of learning another language fun and exciting.
